

# Test Chunking

*Rebel*

*September 17, 2018*

```
knitr::opts_chunk$set(error = TRUE, comment = NA, warnings = FALSE, errors = FALSE, messages = FALSE, t.  
library(knitr)  
eval_chunks <- c('chunk2', 'chunk3')
```

```
[1] "chunk2"
```

```
[1] "chunk3"
```

```
# Choose the language at the beginning of your script or knit from external file  
lang <- c("EN", "FR")[1]
```

### For titles and subtitles when at the beginning This above chunk allow for markdown syntax

### And for titles in the middle if there is space line above And you can use it for normal text or *italic* or **other**
